EXPLORATION PERMITS FOR COAL GRANTED

Pacific Enviromin Limited (“PEV”) is pleased to announce that a further three Exploration Permits for Coal have now been granted (EPC’s 1995, 1996 & 1997). This brings the total number of granted EPC’s held by the company through its subsidiaries Mining Investments One Pty Ltd and Area Coal Pty Ltd to ten. Granted EPC’s are highlighted in green in the following table.

The newly granted tenements are included in the North Comet project area which has sufficient exploration potential to justify a drilling program to test the open cut coal potential. Local infrastructure, including road, rail and power are reasonably developed.

COAL TENEMENTS

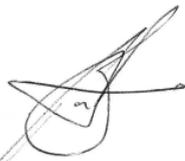

TENEMENT	TENEMENT NAME	STATUS	AREA (Sub-blocks)	AREA (KM ²)	COMMENTS
Area Coal Pty Ltd					
EPC 1645	Mount Hess	PENDING	22	70.33	Competing Application

EPC 2037	Almoola	PENDING	6		

*EPP Exploration Permit Proposal Issued

The philosophy of PEV's management has been to secure strategic tenure by identifying available tenements close to operating mines or in areas with proven or potential in-ground resources in regions suitable for short term development.

Earlier this year the company commenced an Expression of Interest process seeking to identify opportunities for exploiting the commercial value of the projects. The company is entering into final negotiations with interested parties. It is expected that the company will realise a number of development opportunities from this process including farm-in, joint venture development or joint venture exploration.
